3M™ Microbial Luminescence System

Test smarter. Know quicker. Release faster.

The 3M™ Microbial Luminescence System (MLS) is a rapid method for release testing of Ultra High Temperature (UHT) and Extended Shelf Life (ESL) processed products. The 3M MLS allows faster positive release of products over 48 hours sooner than traditional methods, in a semi-automated format for high throughput applications.

3M™ Microbial Luminescence System Ultra High Temperature (UHT) Beverage Screen Kit

Delivers real-time results in 27 minutes when testing 96 samples. Expands the application from UHT dairy products to a wide variety of UHT and ESL beverages such as fruit juices, caffeinated drinks, coconut waters, smoothies, dairy, dairy substitutes and dairy/juices mixtures.

3M™ Microbial Luminescence System Ultra High Temperature (UHT) Dairy Screen Kit

Designed to detect a broader range of microorganisms than traditional methods. Can be used for a wide variety of dairy UHT beverages.
